INDOT - Toll Road District

New Charge Account Information

Credit Arrangements

The Indiana Toll Road is prepared to extend credit privileges to any responsible business firm operating commercial vehicles or passenger car fleets on the Indiana East-West Toll Road, providing monthly toll charges will meet or exceed a minimum dollar value established by the Toll Road. A minimum charge (\$75.00) has been deemed necessary in the efficient operation of our credit system. In addition, a Surety Bond is required in the amount to cover estimated monthly charges. The bond amount will be determined according to your estimate of monthly charges and the bond form will be sent to you once the preliminary application is returned to us.

The estimated monthly charges can be determined by using the Toll Schedule, which is located at: www.state.in.us/dot/motoristinfo/.

Once the preliminary credit application is received and processed in our offices a second package of information will be sent to the company for completion. This packet will contain: two (2) Agreement forms, one (1) charge plate order form, and two (2) Bond forms. After this paperwork is filled out the company must send the originals of both Agreement forms, the order form and one copy of the Bond form. The other copy of the bond form is meant for the company's records.

Credit authorization will be a charge plate (sample shown under charge plate), which will be used continually, in such reasonable quantities, as you deem necessary.

Charge Plates

The Indiana Toll Road charge plate is a magnetic stripe credit card. This credit card will identify your account number and a four-digit identification number that can be assigned to a particular driver, tractor, or truck. From this information ID number, you can immediately identify who made the charge and from which plaza on the Toll Road.

In the event a credit card is lost or stolen, a letter or fax (fax # 574-651-1817) from your company will enable us to cancel that particular card immediately.

If an attempt is made to use the card, our computer toll equipment will reject the credit card and our toll attendants will then pick up the card to ensure that unauthorized persons cannot use it.

Monthly Billing

Indiana Toll Road billings are made monthly, in detail. Payment will be due within thirty (30) days of the date of billing. For your information, samples of our invoice and statement are illustrated below.

To Apply

Preliminary Credit Applications for credit privileges should be mailed (or can be faxed to 574-651-1817) to:

INDOT – Toll Road District Attn: New Charge Account – Company P.O. Box 1 Granger, IN 46530

If you have any questions or concerns please call (574) 651-2492 for further assistance.

Permits Available to Truckers:

- 1.) Special Hauling Permits for dimensions and weights over the legal limits are available in most instances from the Indiana Department of Revenue, phone (317) 615-7320.
- 2.) Annual Permits for the operation of double and triple trailer units on the Indiana Toll Road are available from the Toll Road Patron Services office, (574) 674-8836 extension. 420 or 421.

Benefits of Using the Indiana Toll Road:

Speed Limits

Maximum speed for all vehicles as posted, with a minimum of 45 mph.

Patrol Protection

No one is alone for long on the Indiana Toll Road. Around-the-clock patrol on the Road by trooper and maintenance personnel aid and assist truckers and motorists if anything goes wrong.

Travel Plazas

Ten Travel Plazas offer popular restaurant choices, C-stores and gift shops, modern restrooms, telephones, ATM's vending and lottery. Quality fuels, motor oils and fluids, air and accessories are competitively priced. New high mast lighting systems and expanded parking areas. Truck only parking areas are also available at all travel plaza locations.

Safety

Move your personnel and equipment with much greater safety on the Indiana Toll Road. **NO** intersections. **NO** stoplights. **NO** railroad crossings. **NO** sharp curves. **NO** steep hills. None of the delays and irritations of conventional highway travel. **NO** sudden stops to shift loads, or harm livestock. The Indiana Toll Road is **SAFER**!

All Weather

Often, in the kind of winters common in the Midwest, the Indiana Toll Road is the only all-clear link east and west. Maintenance workers and equipment work night and day to keep the Road in the best possible condition.

Through-Route

The Indiana Toll Road is a vital transportation link in the unbroken network of super highways that now run all the way from Boston and New York to Chicago, Milwaukee and points west. As the "Main Street of the Midwest," the Indiana Toll Road provides quick and easy access to markets east and west, at low cost.
